

Before  
The Public Service Commission  
of  
South Carolina

Docket No. 2017-13-A  
(Year 2017 – 2018 Proceeding)

**POST-HEARING EXHIBITS**

TESTIMONY OF  
BENJAMIN S. SMITH

for  
Chem-Nuclear Systems, LLC

## **EXHIBIT 1**

Current Active Well Count: 98 on site; 65 off site

## **EXHIBIT 2**

Number of Other Divisions (re: SGA): 14

### **EXHIBIT 3**

#### **Disposal Software:**

The software license and maintenance was originally invoiced by the vendor every three years. In 2013, we paid the invoice and the full amount was expensed in that year. Therefore, there was no invoiced amount in 2014. We used 2014 costs to estimate 2015, and then used 2015 costs to estimate 2016 costs. In 2017, we were invoiced again. However, with the 2017 invoice, we put the portion associated with any future periods into a prepaid account. Each year of the contract period the appropriate amount is expensed (amortized).

## **EXHIBIT 4**

### **HVAC Costs:**

The units for the Main Administration Building were replaced. The units, which were obsolete due to their age, were replaced when one of the units went out of service.
